

Optum Care Washington

Agent guide

Partnering to deliver better outcomes for
your Medicare Advantage clients

Compassionate care for your clients

We specialize in caring for adults age 65+. You specialize in helping your clients find the best Medicare plan for their individual needs. Together, we can improve your clients' health and well-being through quality care that's affordable and accessible.

Who is Optum?

We're a family of dedicated physicians working together to help people across the nation live healthier lives. Our networks include:

89,600+
doctors and specialists

18+ million
people who trust us with their care

4.6+ million
Medicare Advantage members

1,700+
neighborhood clinics across the U.S., offering high-quality primary and specialty care

100+
accepted health plans

What does Optum Care Washington do for your clients?

You want the best for your clients, and we do too

Our doctors focus on building deep relationships with each patient and spend time listening to their concerns and answering all their questions.

We elevate well-being. With a personalized action plan, each patient can keep on top of their health issues and prevent new ones.

Optum Care Washington teams from across the health care landscape work together to innovate and simplify the care delivery process. Your clients can feel better about care that's more predictable and affordable.

Providing high-value, personalized and coordinated to Medicare beneficiaries in the communities we serve

Medicare Advantage plans are among the most popular and fastest growing health plans in the country.¹ Through our care delivery organizations, Optum Care Washington and our extensive contracted provider network, Optum Care Network, we are able to serve Medicare Advantage patients across Washington state.

Care management programs

We offer patient-centered care that's designed to assist patients and their families in managing medical conditions more effectively.

Collaborative care for your patients

Our team of nurses, pharmacists, social workers and health educators work with each patient to develop a care plan that puts them on a path for a healthier future. This plan may include:

- Annual Wellness Visits, in-home care and virtual care
- Medication management
- Preventive care, general and high-risk screenings and immunizations

Complex care⁴

We teach patients how to manage conditions such as congestive heart failure, chronic obstructive pulmonary disease, kidney disease and diabetes. We also offer in-home and telephonic programs for patients who need more support in managing their complex or chronic diseases. These programs are led by experienced registered nurses, social workers and health advocates who assist patients and their families in managing their condition through education, coordinated care and community resources.

Call Us First

Our Call Us First team is a 24-hour care advice line that helps our patients find the right level of care at the right time. Patients have peace of mind knowing that the Call Us First team is always available to help determine next steps, no matter what their care plan is.

Pre-visit planning⁵

A telephone call with a clinical staff member (medical assistant or nurse) will prepare patients for their upcoming visit by reviewing screening forms and their medications from the comfort of their home. This ensures their primary care provider has the time to address the patient's concerns and questions during their Annual Wellness Visit.

Hospitalist and post-discharge programs⁵

Our case managers oversee the care of patients while they're in the hospital or a skilled nursing facility. Our team ensures patients receive care and safely transition from the hospital to their home.

Palliative care education⁶

This specialized program is most commonly used for patients and their families facing advanced stages of metastatic cancer, chronic diseases or cognitive impairment. Patients and family members receive mental health and symptom management support.

Memory Health Support program

Optum Care Washington primary care physicians and neurologists are trained to diagnose cognitive issues so patients can get answers without waiting to see a specialist. Our unique memory loss and caregiver support program is designed to streamline the path to care for patients and their caregivers. Optum Care Washington works side-by-side with Rippl Care to provide patients with a team of care navigators and social workers to help facilitate memory care with our clinicians.

A warm welcome from Optum

Our comprehensive onboarding program⁹ makes sure your Medicare Advantage clients start their patient journey on the right track.

Here's what your clients receive when they join Optum Care Washington:

Welcome call from our onboarding team

- Get them oriented with programs that help round out their care such as transportation assistance, in-home assessment and care management
- A welcome packet mailed to their home
- Referral and medical records transfer, if needed
- Referral coordination support to a specialist

Help checking off their Annual Wellness Visit

- Personalized call from our AWV outreach team to provide assistance with scheduling their appointment
- Letters and email messages to remind patients to schedule their AWV and but also to explain the benefits of getting an exam
- Post-visit call to ensure all AWV follow-up appointments are scheduled

Optum Care Washington

The Everett Clinic was founded in 1924 and The Polyclinic was founded in 1917. Together, they are now Optum Care Washington, a nationally known group of doctors whose focus is on personalized health care. Their mission is to help people live healthier lives and make the health system work better for everyone.

Optum Care Network locations

Optum Care Network

The Optum Care Network (OCN) of Washington strives to help people live their healthiest lives. OCN coordinates a state-wide ambulatory care network of employed clinicians and affiliated medical groups for multiple payers under one umbrella. It provides programs that help these OCN practices reinforce the high-quality care they are providing to their patients. OCN practices also have access to a national team of doctors connecting their patient care to the latest evidence-based breakthroughs to support affordable, high-quality health care.
